

CPSC 3720 - Agile Project

Emily, Anna, Milka

Sprint 1: Coding + Testing

Progress	Blockers	Next Steps
Generate code for study buddy app	N/A	Add AI input and output to main document
Web app set up on Python Anywhere	Code organization was insufficient; there were duplicate blocks of code inside HTML files	Redo where blocks go in HTML files
Most main features working, such as login, register, and dashboard	Some features are not working yet, such as browse courses, create a session, create study session, courses, and sessions	Generate code for missing features
Register a sample account	N/A	Use sample account to test other features
Login to the sample account	N/A	Use sample account to test other features

Sprint 2: Continue Testing + Final Code Fixes

Progress	Blockers	Next Steps
Create a sample study session	HTML code not fully completed	Generate completed code
Join a sample study session	HTML code not fully completed	Generate completed code
Browse courses	N/A	Continue searching through courses as needed
Enroll in a course	N/A	Continue enrolling in courses as needed
Drop a course	N/A	Continue dropping courses as needed
Log out of sample account	N/A	N/A

Sprint 3: Final Testing + Deliverable Documents

Progress	Blockers	Next Steps
Create user stories	N/A	Add AI input and output to main document
Create product backlog	N/A	Add document to the final project
Create a sample study session	N/A	Continue making study sessions as needed
Join a sample study session	N/A	Continue joining study sessions as needed
Add documents to the final project	N/A	N/A
Create demo video	Small technical difficulties while recording, but resolved quickly	Upload video
